

Call for Papers: Transplantation

The Journal of Immunology (The JI) publishes peer-reviewed manuscripts describing novel findings in all areas of experimental immunology, including basic and clinical studies.

The JI is seeking to publish a **special collection of transplantation articles*** in 2023.

These articles may be **full-length, original research** or [Translating Immunology**](#) articles.

Subject areas may include:

- Organ, tissue, and stem cell transplantation
- Organ and tissue modification, engineering, donation, and preservation
- Xenotransplantation
- Histocompatibility
- Drugs and pharmacology
- Graft-versus-host disease
- **Bench-to-bedside review article highlighting the evolution of patient treatment protocols (for examples, please see our [Translating Immunology](#) section)
 - Please email eic@aai.org with proposals for these manuscripts and include brief outline and proposed title.

Submitted manuscripts should not have been published previously, nor be under review at another journal. Manuscripts will be evaluated following our typical peer review process and are expected to meet the standards for publication in the AAI journals.

All manuscripts should be submitted online via our online [submission system](#). During the online submission process, select "Transplantation" under the "Category" drop-down menu. Please visit the [Instructions for Authors](#) page for more information on preparing your manuscript.

For additional information, please contact infoJI@aai.org with "Transplantation" in the subject line.

Submissions will be reviewed as they are submitted until **July 31, 2023**. This special collection is expected to publish as a digital collection in 2023, but papers will appear online as they are accepted.

****Publish your original transplantation studies with us and receive 2 FREE color figures!***
