

Supplemental Figure 1: T cell subset markers

Splenic naïve CD4⁺ T cells from *Il17^{Cre/Cre} R_S^{+/YFP}* mice were cultured in Th1, Th2, and Th17 cell polarizing media for 5 days. *Rora*, *Rorc*, *Pparg*, *Tbet*, *Ifng*, *Gata3*, and *Il1rl1* mRNA was quantified from these different subsets. One-way ANOVA with Tukey's post-hoc test was used for comparison of three groups. ****p<.0001.
