

Supplementary Figure 1

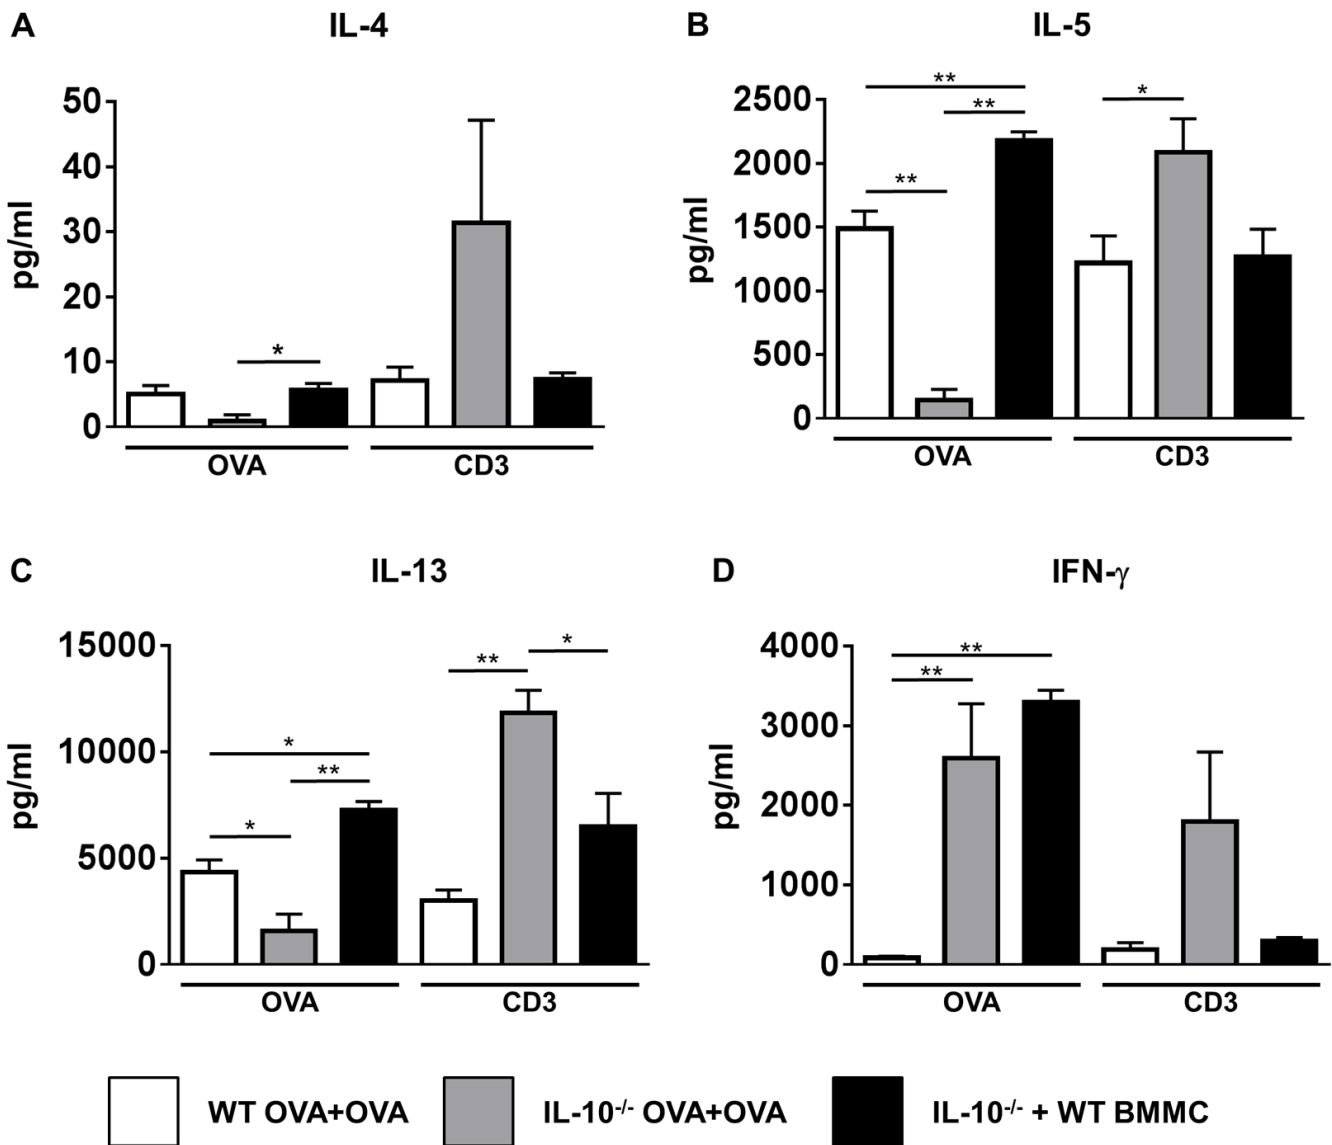

Figure S1. Adoptive transfer of WT BMMCs restores Th2 cytokine production by spleen cells from OVA-challenged IL-10^{-/-} mice. Spleens were isolated from experimental animals and stimulated with either OVA or T cell agonists for 72 hours. Levels of the cytokines (A) IL-4 (B) IL-5 (C) IL-13 and (D) IFN-γ were enumerated in the supernatants by ELISA. *= $p < 0.05$; **= $p < 0.01$. (student's t-test).
