

Fig. S1. Antagonism of CD11b does not inhibit serum levels of inflammatory cytokines in CLP-induced polymicrobial sepsis. C57BL/6 mice were pretreated with PBS as the control, CD11b blocking Ab (2.0 mg/kg) and Gu-4 (0.9 mg/kg) for 30 min, and further challenged with CLP-induced polymicrobial sepsis. Blood samples were collected at the indicated time points and serum IL-6 (A), IL-10 (B), and IL-12p70 (C) were assessed as described in the Materials and Methods. Data shown are mean \pm SD of three mice per time point, * $p < 0.05$, ** $p < 0.01$ versus 0 h.
