Supplementary Figure 1. SP100 increases in CD3⁺ T cells and CD163⁺ macrophages in lymphatic tissue during HIV-1 infection. (A) Representative immunofluorescent micrographs reveal SP100 protein expression (red) in the nuclei of LT CD3⁺ T cells (green) and CD163⁺ macrophages (blue) from subject # SU36 (A) and an uninfected individual (B). Enlarged images depict areas circled in white. Original magnifications: X600; scale bars: 20 μ m.
